Do You Need Life Support?

Does this sound like anyone you know?

- Is discontent eating you alive?
- Do you chase success, but it keeps eluding you?
- Are you caught in a cycle of boom or bust, with longer and longer periods of bust in between the booms?
- Are you fed up with the methods of those with whom you have to interact, and are often torn between principle and the bottom line?
- Do you long to do something else in hope it will bring you the prosperity, satisfaction, and peace of mind you crave?
- Do you feel like you're just going through the motions, getting little joy out of your efforts, much less the results you want?
- Are you trying to start something new, but don't know how to extricate yourself from the situation you're in now?

See and deal with troubles in a better way!

- Know where you're going and how to get there;
- Discover and address what's holding you back;
- Make your business serve your life – and vice versa;
- Manage conflicts to stop the bleeding
- Allow yourself to make a difference while building the bottom line;
- Revitalize your efforts by honing your message/market focus, exploring venture financing, and expanding your online presence with Web 2.0 and digital media strategies.
